Professional Experience

Tata Consultancy Services — Ahmedabad / Gandhinagar, India

Systems Engineer (Software Engineer) — June 2024 – Present

- Contributed to ICAI's UDIN and CPE enterprise platforms serving 4,000+ daily active users, building responsive, production-grade user interfaces and business-critical workflows.
- Developed reusable and responsive Angular components using TypeScript, HTML, and CSS, reducing UI duplication and improving design consistency across application screens.
- Handcrafted UI implementations from design requirements into functional, maintainable frontend components, working closely with frontend, QA, and client teams.
- Strengthened frontend-backend integration by consuming secure, JWT/Spring Security-backed REST APIs for reliable end-to-end data exchange.
- Engineered modular REST APIs using Java/Spring Boot and TypeScript, enabling consistent and maintainable frontend-backend integration across systems.
- Optimized PostgreSQL schemas and SQL queries and introduced Redis-based caching to improve API response times and overall application performance.
- Improved application reliability through unit and integration testing, and debugging using browser console and application logs, while delivering production features on schedule in Agile sprints.
- Owned development of an internal Project Management module from design through deployment, expanding internal application capabilities.

Projects

Online Grocery Ordering Platform (Backend) | Java 17, Spring Boot 3, PostgreSQL, Redis, JWT, Spring Security — GitHub

- Built a Spring Boot 3 backend (Java 17) using Spring Data JPA and PostgreSQL to power REST APIs consumed by frontend clients.
- Implemented JWT-based authentication and Spring Security to secure REST endpoints.
- Integrated Redis for caching and documented REST APIs with springdoc-OpenAPI (Swagger UI) to support frontend integration and maintainability.

Technical Skills

Frontend: Angular, TypeScript, JavaScript, HTML, CSS, Reusable UI Components, Responsive Design, Frontend-Backend Integration
Languages: JavaScript, TypeScript, Java, SQL, C++
APIs & Security: RESTful Web Services, JWT Authentication, Authorization, OpenAPI/Swagger
Backend: Spring Boot, Spring Security, Spring Data JPA, REST APIs, Microservices
Databases: PostgreSQL, MySQL, Redis (Caching)
Testing & Debugging: Unit Testing, Integration Testing, Browser Console Debugging
Tools: Git, Maven, Postman, JIRA, Log4j2
Engineering: Data Structures, OOP, Clean/Maintainable Code, Performance Optimization, SDLC, Agile/Scrum, CI/CD Basics

Education

Vasavi College of Engineering — Hyderabad, India

B.E. (Hons.) in Electronics and Communication Engineering, CGPA: 8.79/10 — 2020 – 2024

Honors & Awards

On the Spot (Team) Award | Tata Consultancy Services (TCS) — July 2026

- Recognized for outstanding contribution, dedication, and positive impact within the organization.
